PART 4

Read the passage about Pompeii. Then choose the correct answers.

Pompeii: A Window to Ancient History

Pompeii was a rich and lively city on the bay of Naples, south of Rome. Wealthy Romans came to spend the summer there in large and beautiful villas. Then, on August 24 in the year 79, Vesuvius erupted. The volcano buried the city under 60 feet (18 meters) of ash and killed thousands of people. It also destroyed a great many of the buildings. But not all of them. The ash preserved many houses, streets, theaters, statues, and a lot of beautiful art.

Pompeii's ruins stayed buried for almost 2,000 years. Then one day in 1748, a Spanish engineer discovered them. Since that time, archaeologists have dug up many everyday objects from this ancient civilization. Furniture, jewelry, money, and even a little food remain from that terrible day. Today we can "see" the daily lives of people in the first century in a couch made of wood, beautiful bracelets and rings, and bowls and cups made of glass. Preserved fruit, vegetables, bread, eggs, and olives tell us meals then were not so different from meals now!

Today Pompeii is "alive" again. Millions of tourists walk its streets each year. This amazing unintentional time capsule shows them what everyday life in ancient Rome was like. It is their window to ancient history.

- 1 What is the main idea of the passage?
 - A Archaeologists spent over 250 years digging up an ancient city.
 - B People now have access to remains of an ancient city.
 - C Volcanoes have destroyed cities unexpectedly.

- 2 According to the passage, the volcano's ash preserved _____ in Pompeii.
