

NAME _____ DATE _____

REVIEW TEST: UNIT 28**GRAMMAR****PART 1****Choose the correct answers to complete the conversation.**

Carmen: So, Pablo, where are you from? I mean, what city?

Pablo: I was brought up on a small farm in southern Mexico. I helped my father **(1) over / out / at** in the fields. But then we moved to Mexico City. It's a big change. Instead of working in the fields, my father puts his suit **(2) in / off / on** and goes to work. What about you?

Carmen: I grew up near the border between the United States and Mexico. I learned how to speak English when I was six years old. I picked **(3) out / up / on** English easily. That has been really helpful for me.

Pablo: I bet!

Carmen: I visited Mexico City once. Does your family like it there?

Pablo: Well, my dad misses our small town, but my mom always points **(4) into / out / by** that there are more opportunities in a bigger city. I came to the United States for that reason, too. When did you come here?

Carmen: My family moved to California when I was ten. I attended elementary school, and my sister went **(5) out / up / on** to college. She's ten years older than me.

Pablo: You know, Carmen, it's nice talking to you. I'm glad we signed **(6) into / out / up** for the same class.

Carmen: Me, too.

NAME _____ DATE _____

PART 2**Choose the correct answers to complete the sentence. There may be more than one answer.**

- 1 Remember to hand _____ to your professor by 4:30.
 - A out your assignment
 - B your assignment out
 - C in your assignment
 - D your assignment in
- 2 After graduating university, Akiko plans to go _____ in graduate school.
 - A out with her studies
 - B with her studies out
 - C on with her studies
 - D with her studies on
- 3 I hate this device. I have no idea how to turn _____.
 - A it off
 - B off it
 - C it on
 - D on it
- 4 My best friend, Li Li, was born in China and grew _____.
 - A out there
 - B there up
 - C up there
 - D there
- 5 “Hey there, Jim! Welcome to my office. Feel free to relax. Here, sit _____.”
 - A down on this chair
 - B on this chair down
 - C this chair on
 - D on this chair

NAME _____ DATE _____

READING

PART 3

Read the text. Then choose the correct answers.

Looking for a job?

A report released yesterday by the Employment and Education Bureau finds that job availability in STEM (Science, Technology, Engineering, and Math) fields is expected to go up by nearly 20 percent over the next ten years. Compare that with less than ten percent for non-STEM jobs. "After looking at the data for months, we have no doubt that this trend will continue," says Jason Kieffer, author of the report.

The report also points out that STEM jobs pay better, too. In 2012, STEM workers with graduate degrees earned roughly ten percent more per hour than their non-STEM counterparts. What's more is that STEM workers without graduate degrees earned upwards of 25 percent more than their non-STEM counterparts.

As if pay wasn't enough, the report also contained unemployment data. It finds that the number of people who don't have jobs is almost twice as high (about ten percent) in non-STEM fields than in STEM fields.

STEM education, with high funding from governments and high interest from students, seems to be taking off as well. But, with so many students graduating with STEM degrees, and more moving on to higher degrees, will the high pay and high employment keep up? "That's something we didn't bring up in the report," say Kieffer. "What we know is that the field will grow. We don't know about the pay."

- 1 Which sentence best describes the main idea of the article?
 - A STEM education is growing faster than in the past.
 - B Employment and pay in STEM fields is on the rise.
 - C People with STEM jobs have a better life.

- 2 Based on the information in the article, which idea is *probably* true?
 - A The gap between STEM unemployment and non-STEM unemployment will go up in the future.
 - B The good jobs in STEM may change in the future because there are many students in the field.
 - C Governments are likely to keep on funding STEM education in the future.

- 3 The report includes information about future _____.
 - A growth in the number of STEM jobs
 - B unemployment in non-STEM fields
 - C salaries in STEM fields

NAME _____ DATE _____

LISTENING**PART 4**

Listen to the conversation between Adrianna and Wang Tao. Then choose the correct answers.

- 1 What did Adrianna and Wang Tao hear about in class?
 - A chimpanzees
 - B elephants
 - C bears

- 2 According to the conversation, both Wang Tao and Adrianna are definitely going to _____.
 - A figure out the pronunciation of zoopharmacognosy
 - B submit their assignments to the professor
 - C find out more about zoopharmacognosy

- 3 How did Adrianna learn about zoopharmacognosy?
 - A from her own research
 - B from her professor
 - C from Wang Tao

- 4 Which sentence is *probably* true?
 - A Wang Tao thinks animals learn about their “medicine” from other animals.
 - B Adrianna thinks humans learned about their “medicine” from animals.
 - C Both Wang Tao and Adrianna have assignments about zoopharmacognosy.

- 5 According to the conversation, which animal uses leaves for medicine?
 - A chimpanzees
 - B elephants
 - C bears

NAME _____ DATE _____

SPEAKING**PART 5**

Look at the series of pictures. Think about a way to connect the pictures in a simple story. Then say the story. Use phrasal verbs.

NAME _____ DATE _____

WRITING

PART 6

Think about how you find information. Then write one or two paragraphs that describe the different ways that you can find information. Use phrasal verbs such as *take off* in your writing. Here are some other verbs you can use:

- *call* + particle
- *figure* + particle
- *find* + particle
- *pick* + particle
- *look* + particle
- *write* + particle

[illegible]
