C can't

5 In fact, every astronaut is given a laptop that _____ used for listening to music or emailing friends and family.

A has to be

B could be

C can be

6 After the workers relax, they go back to their jobs, where everything _____ very carefully.

A must be done

B ought to do

C might be done

NAME _____ DATE _____

READING**PART 3****Read the article. Then, choose the correct answers.****Bored of the Beach? Take a Holiday in Space!**

If you like to reach for the stars when it comes to travel, you may be intrigued about a trip to space. Space travel isn't cheap. It can easily cost you millions of dollars. But there are a surprising number of companies offering out-of-this-world fun.

In 2001, Dennis Tito, an American businessman became the first space tourist. He paid \$20 million dollars to spend seven days in the International Space Station. Tito was flown into space by the Russian Space Agency and trained in both Russia and the U.S. Due to the large price tag, few people have been able to join him. The most famous person was Canadian Guy Laliberté, founder of Cirque du Soleil. However, there are other options to travel to space.

If you can't afford to go to the International Space Station, Virgin Galactic has a solution. For around \$200,000, you can travel into suborbital space. This private company will send you in a rocket to a height of 68 miles, where you will enjoy a true outer space experience. Although you will not be high enough to enter Earth's orbit, you will feel the effects of zero gravity. You'll be allowed to remove your seat belts so you can float around. However, you will be required to wear a space suit at all times.

World View is the latest company to offer a high-altitude ride. The company will launch a capsule that will carry six passengers into the atmosphere, 100,000 feet above Earth. It's not quite space travel, but you can still enjoy a breathtaking view high above the world. The trip will last six hours and cost \$75,000. World View has completed several test flights. They hope to start commercial flights later this year.

If \$200,000 is still beyond your budget, your dreams of a space adventure don't have to be abandoned. NASA, the American space agency offers a day of astronaut training in Florida for \$145. Go through the same training as a real astronaut! Even better, your name could be put on a microchip that is part of a future NASA research project for free.

Although space tourism sounds like fun, don't forget that it can also be very dangerous. Most space tourism programs require you to go through some training. This is because you may need to help the crew. You will also need to submit your medical records to be sure you are healthy. But don't forget that space travel is stressful. The extreme height and the small space can cause anyone to lose control of themselves. All potential space tourists should ask to undergo a simulation before going to space to be sure they are prepared mentally for the experience.

- 1 Why don't more people go to the International Space Station?
 - A It is too expensive.
 - B It is only possible to go one week a year.
 - C It requires international permission.
- 2 What must you wear all the time on the Virgin Galactic space flight?
 - A your seatbelt
 - B special clothes for space
 - C a microchip

NAME _____ DATE _____

3 Which organization is not offering trips at this time?

- A World View
- B Virgin Galactic
- C Russian Space Agency

LISTENING

PART 4

Listen to the podcast. Then choose the correct answers.

1 Why can't astronauts take showers in space?

- A Shower equipment is too complicated to work in space.
- B Showers don't work properly without gravity.
- C Showers take too long for their work schedule.

2 What happens to the dirty bath water?

- A It is released into space.
- B It is recycled to use again.
- C It is brought back to Earth.

3 What does James say happens to dirty clothes?

- A They are destroyed.
- B They are replaced with new clothes.
- C They are sent back to Earth for cleaning.

4 What does James say about his job?

- A It's a job that lets him help other people.
- B It's exciting because it's a dangerous job.
- C It's a dirtier job than he thought it would be.

5 What is the theme of the podcast, *Messy Jobs*?

- A jobs that are very dangerous or risky
- B tips on how to get an exciting job
- C parts of jobs that deal with staying clean

NAME _____ DATE _____

SPEAKING

PART 5

Imagine that you are planning to live in a small apartment for a reality TV show program. Think of five rules that should be made for living in close quarters. Use the passive with modals and similar expressions. You may want to consider some of the issues listed below.

- Food
- Cleanliness
- Privacy
- Room temperature
- Noise
- Sleep time

WRITING

PART 6

Imagine that you are going to attend a school for students who want to become astronauts. Use your information to write two paragraphs about your ideal school for diplomacy. In the first paragraph, talk about the kinds of courses that would be required, as well as any training or practice. In the second paragraph, talk about the living quarters and what buildings or spaces will be needed. Use the passive with modals and similar expressions.
