READING**PART 3****Read the article. Then choose the correct answers.****Hobbies That Have Become Jobs**

We are not all going to turn a well-loved hobby into a profession, but experts say that if we follow our natural interests, we give ourselves the best chance to grow into successful human beings. They believe that is because we are much happier when we are doing something we love. Below are two stories from women who have turned their hobbies into a means of making money.

Here is Sally Acton's story of how she turned her hobby into a job: "I personally turned my love of glass-collecting into a business. I've always loved traveling in Asia and Africa, and have been buying small pieces of colored glass, for as long as I can remember. After some time, I began to make pieces of jewelry from them, and started giving them to friends as gifts. One of those friends, who owns a store, suggested I put some in her shop window. Within a week she sold every piece and asked me to give her more. Since then, she's been selling a lot of what I make. At a certain point, I was so busy that I had to make a decision whether to leave my day job or stop making jewelry for her shop. Of course, in the end, I decided to follow my passion, and I haven't looked back since. I've also begun my own website and am selling the jewelry online. I never expected this to happen, but I'm so much happier now than when I worked in the insurance business."

Alison McGregor had an accident, hurt her back, and then that changed her life. Here is her story: "I've always sewn and collected fabrics. I learned how to sew from my grandmother. I just never considered it was something that could make me any money. After my accident though, I was unable to return to my job as a massage therapist. So during my recovery I began sewing new cushions for my house. During my career, I was famous for my "Hot Stone Massage," and I guess it was that which led me to the idea of putting small stones into one of my cushions. After I made it, I heated it in the microwave and laid it on my back. It was very effective and what's more, was beautiful to look at. I took some samples to my old job and they loved it. They bought a bunch, and I've been selling them ever since. I've been doing it now for two years, and get orders from all over the world. I enjoy the work and feel much more creative and relaxed."
