READING**PART 3****Read the article. Then choose the correct answers.**

In the 1850s, the U.S. government constructed a fortress commonly known as Alcatraz on an island in the San Francisco Bay. It was originally used exclusively as a prison by the U.S. Army, but in 1933, control of Alcatraz was transferred to the U.S. Justice Department. Alcatraz was converted into a federal prison, and after one year of reconstruction to make the facility more secure, the most dangerous and violent criminals of the U.S. were sent to serve their prison sentences starting on July 1, 1934. Many infamous inmates have been imprisoned for various reasons, including gang activity, corruption, and murder. Some were imprisoned at Alcatraz because other prisons weren't secure enough. For example, Al Capone, a gangster, was transferred to Alcatraz after authorities realized he had continued to conduct crimes remotely from his original prison cell in Atlanta, Georgia.

Because Alcatraz is isolated and surrounded by water, no inmate successfully escaped. Thirty-six prisoners tried to escape over the years, but over half were captured and six were killed by prison guards while fleeing. Two prisoners drowned and five have never been found. Perhaps the most daring of the escapes was made in June 1962 by three of the men who are still missing today: John Anglin, Clarence Anglin, and Frank Morris. Authorities believe kitchen spoons were used by the men to dig a tunnel out of their cells in order to climb up to the prison roof. From there, they were carried by a raft made from coats into the bay.

The water was searched by authorities and the coast guard, but none of the men were found. Instead, several life vests and an oar were retrieved, as well as a plastic bag filled with addresses and mail. Many people believe the men drowned because the water would have been freezing, and the men could have easily been carried away into the Pacific Ocean by the strong waves. In fact, a body near the Golden Gate Bridge was allegedly sighted by a crew on a ship from Norway, but to this day, it hasn't been confirmed that any of the men were killed by their escape attempt. Although they broke the law and committed crimes, the Anglin brothers and Morris weren't violent. Unlike other criminals at Alcatraz, these three men were imprisoned at this isolated facility because they had escaped from other prisons.

After almost thirty years operating as a prison, Alcatraz was closed by the federal government for several reasons. First, the cost of maintaining the prison was too expensive, especially because food and resources were shipped to the island. Additionally, the building was regularly damaged by the salt in the environment. As a result, the building needed constant repairs. In 1973, Alcatraz was opened to public visitors for the first time since its usage as a prison. Due to its long and unique history, it is a popular tourist destination and welcomes approximately one million visitors annually.
